Signature confirms that the student agrees to the terms, conditions, and requirements of the Internship Program.

REQUEST LETTER FROM INSTITUTE TO INTERNSHIP PROVIDER

Date: / / 20

To,

The General Manager (HR),

SpryIQ Technologies Pvt. Ltd. Pune

Baner, Pune, Maharashtra- 411045

Subject: Request for 12 Weeks Industrial Internship for B. Tech / 4 years Degree Programme Students.

Dear Sir,

You must be aware that AICTE has made internship mandatory for all technical education students. In view of the above, I request your good self to allow our following students for practical training in your esteemed organization.

Kindly accord your permission and give at least one-week time for students to join training after confirmation.

Sr. No.	Name of Students	Roll No.	Year	Discipline	GPA
1.	Kodag Rutuja Prakash	40	2025-26	CSE	9.06

A line of confirmation will be highly appreciated.

With warm regards,

(Internship Coordinator)

REQUEST LETTER FROM INSTITUTE TO INTERNSHIP PROVIDER

Date: / / 20

To,
The General Manager (HR),
Ms. Prasham Pangarkar,
SpryIQ Technologies Pvt. Ltd. Pune,

Subject: Request for 12 Weeks Industrial Internship for B. Tech / 4 years Degree Programme Students.

Dear Sir,

Our Students have undergone internship training in your esteemed Organization in the previous years. I acknowledge the help and the support extended to our students during training in previous years. We hope this year also our students will get an opportunity to work with you and understand work culture.

Kindly accord your permission and give at least one-week time for students to join training after confirmation.

Sr. No.	Name of Students	Roll No.	Year	Discipline	GPA

SKN SINHGAD COLLEGE OF ENGINEERING,
KORTI, PANDHARPUR**

PART II: Internship Objectives/Learning Activities

What do you intend to learn, acquire and clarify through this internship? Try to use concrete, measurable terms in listing your learning objectives under each of the following categories.

Knowledge and Understanding	• To understand the fundamentals of Large Language Models (LLMs) and their real-world applications. • To learn Retrieval-Augmented Generation (RAG) for enhancing model responses using external data. • To understand prompt engineering techniques for generating accurate and structured outputs. • To gain knowledge of backend development using Flask framework. • To understand database management using MongoDB. • To learn system design for AI-based automation platforms in sales and marketing.	Skills	• Develop skills in building AI-powered applications using Python. • Gain hands-on experience with LLM integration and LangChain framework. • Improve backend development skills using Flask APIs. • Develop database handling skills using MongoDB. • Enhance problem-solving and debugging abilities. • Improve communication and documentation skills.
Learning Activities	<i>How will your internship activities enable you to acquire the knowledge/understanding, and skills you listed above?</i> • Learning through hands-on development of AI-based features. • Experimenting with prompt engineering and LLM outputs. • Implementing RAG pipelines using real-world data. • Developing backend APIs and integrating with LLM modules. • Testing and optimizing outputs for accuracy and performance.		
On the Job Activities	<i>Describe how your internship activities will enable you to meet your learning objectives. Include projects, research writing, conversations etc. which you will do while working.</i> • Worked on development of LLM-based recommendation system for generating customer insights. • Developed AI-driven voice call script generation feature. • Implemented email automation for generating subject and body content. • Built worklist automation and report generation modules. • Developed dashboard and stakeholder data reports. • Performed testing, debugging, and optimization of system features.		
Teaching/Mentoring Activities	<i>How your technical knowledge can be applied at the site of the Internship? How you can create value through mentoring/help people learn new things.</i> • Shared knowledge of prompt engineering techniques with team members. • Assisted in improving AI-generated outputs through collaborative		

Department of Computer Science and Engineering

Savitribai Phule Shikshan Prasarak Mandal's
SKN SINHGAD COLLEGE OF ENGINEERING,
KORTI, PANDHARPUR

	<i>discussions.</i> • <i>Helped in testing and validating system features.</i> • <i>Contributed ideas for improving automation workflows.</i> • <i>Supported team members in understanding LLM-based implementations.</i>
Off the Job	<i>List reading, writing, contact with faculty supervisor, field trips, observations, etc., you will make and carry out which will help you meet your learning objectives.</i> • <i>Studied documentation of LangChain, Flask, and MongoDB.</i> • <i>Explored online resources and tutorials related to LLM and RAG.</i> • <i>Practiced prompt engineering techniques independently.</i> • <i>Maintained regular communication with mentor for guidance.</i> • <i>Documented learning and progress throughout the internship.</i>

PART III: Expected Field of Internship (Prepare after consultation with Industry)

Describe in brief the Project Title or the expected topic related to which internship will be offered

The internship is focused on the development of an AI-powered B2B sales and marketing automation platform titled "Bleezur.ai". The project involves the application of advanced technologies such as Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and LangChain for building intelligent automation solutions.

The primary objective of the internship is to design and implement AI-driven features that assist businesses in improving customer engagement and decision-making. This includes developing a recommendation system for generating weekly customer insights, creating automated email workflows, and generating AI-based voice call scripts for sales communication.

Additionally, the internship covers backend development using Flask and database management using MongoDB. The project also involves automation of worklist tasks, report generation, dashboard data analysis, and stakeholder management features.

Overall, the internship provides hands-on experience in developing scalable AI solutions for real-world business problems, focusing on automation, data-driven insights, and efficient workflow management.

Savitribai Phule Shikshan Prasarak Mandal's
SKN SINHGAD COLLEGE OF ENGINEERING,
KORTI, PANDHARPUR

PART IV: Evaluation

Industry Supervisor will provide following two details to the Faculty Mentor at the end of the Internship

- Total Duration of Internship (In Hours)
- Overall Marks Obtained (Out of 10)

PART V: Agreement

This contract may be terminated or amended by student, faculty coordinator or work supervisor at any time upon written notice, which is received and agreed to by the other two parties.

Student Name	Kodag Rutuja Prakash	Date		Signature	
Faculty Mentor Name	Dr. V. G. Jagtap	Date		Signature	
Industry Supervisor Name	Vishal Trivedi	Date		Signature

RELIEVING LETTER OF STUDENT FROM INSTITUTE

To,
The General Manager (HR),

**Subject: Relieving letter to below mentioned students of SKN Sinhgad College of Engineering
Korti- Pandharpur.**

Dear Sir,

Kindly refer your letter/E-mail dated. ----- on the above cited subject. As permitted by your good self, the following students will undergo Industrial Internship in your esteemed organization under your guidance & directions.

Sr. No.	Name of Student	Roll No.	Branch	Faculty Mentor Name	Faculty Email ID	Postal Address of Faculty
1	Kodag Rutuja Prakash	40	CSE	Dr. V. G. Jagtap	vinayak.jagtap@skscoe.ac.in	

This training being an essential part of the curriculum, the following guidelines have been prescribed in the curriculum for the training. You are therefore, requested to please issue following guidelines to the concerned manager/Industrial Supervisor.

1. Internship schedule may be prepared and a copy of the same may be sent to us.
2. Each student is required to prepare Internship diary and report.
3. Kindly check the Internship diary of the student frequently.
4. Issue instruction regarding working hours during training and maintenance of the attendance record. You are requested to evaluate the student's performance on the scale of 1 to 10 where 1 indicates Unsatisfactory and 10 indicates Excellent Performance and any value in between 1 to 10 holds meaning accordingly.

The performance report of the student (as shown below) must be forwarded to the Faculty Mentor of the student on completion of training in sealed envelope or to the above-mentioned email ID of Faculty Mentor. Performance Report should preferably be printed with Organization Header.

Department of Computer Science and Engineering

Savitribai Phule Shikshan Prasarak Mandal's
SKN SINHGAD COLLEGE OF ENGINEERING,
KORTI, PANDHARPUR

**PERFORMANCE REPORT OF
STUDENT**

Name of Student	Kodag Rutuja Prakash		
Total Hours Devoted for Internship			
Marks Obtained (Out of 10)			
Date		Place	
Industry Supervisor Name		Signature	

Your efforts in this regard will positively enhance knowledge and practical skills of the students, *your cooperation will be highly appreciated, and we shall feel obliged.*

The students will abide by the rules and regulation of the organization and will maintain a proper discipline with keen interest during their Internship. The students will report to you on dated____along with a copy of this letter

**Yours Sincerely,
(Internship Coordinator)**

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	1/12/2025	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

On this day, I started learning about data and its importance in the modern world. I understood how raw facts and figures are considered as data. I also learned how data is processed to generate meaningful information. This helped me understand the role of data in decision-making. I explored different types of data used in real-time applications. This improved my basic understanding of database concepts. I realized the importance of data management. It built a strong foundation for further topics. Overall, it was an informative session.

I studied the history and evolution of Python, understanding how it was developed and improved over time. I learned about its creator and the reasons behind its popularity. The simplicity and readability of Python made it widely accepted. This helped me build a strong foundation for further learning.

Savitribai Phule Shikshan Prasarak Mandal's
SKN SINHGAD COLLEGE OF ENGINEERING,
KORTI, PANDHARPUR

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	2/12/2025	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

I learned about databases and their significance in storing and managing data. I understood how databases organize large amounts of data efficiently. I explored examples of real-world databases. This helped me understand structured data storage. I also learned about advantages like security and data integrity. This improved my conceptual clarity. It gave me insight into real-world applications. I gained interest in database systems. Overall, it strengthened my understanding of databases.

I learned what Python is and its key features such as simplicity, portability, and high-level nature. I also explored its real-world applications in web development, data science, and automation. This gave me a clear idea about its importance in the IT industry. It motivated me to learn the language in depth.

Savitribai Phule Shikshan Prasarak Mandal's
SKN SINHGAD COLLEGE OF ENGINEERING,
KORTI, PANDHARPUR

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	3/12/2025	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

On this day, I studied DBMS (Database Management System). I learned how DBMS helps in managing databases efficiently. I explored its features such as data security, consistency, and backup. This helped me understand its importance in IT systems. I also studied different types of DBMS. This improved my knowledge about database management. I gained clarity on how data is handled. It enhanced my understanding of system operations. Overall, it was a valuable learning experience.

I studied library functions and understood how they help in reducing coding effort. I explored commonly used built-in libraries and their functions. These functions simplified complex tasks and improved efficiency. This helped me understand the importance of reusable code.

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Department of Computer Science and Engineering

Date	4/12/2025	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

I learned about RDBMS (Relational Database Management System). I understood how data is stored in tables using rows and columns. I explored relationships between tables. This helped me understand structured data representation. I also studied advantages like reduced redundancy. This improved my conceptual knowledge. I gained confidence in database concepts. It enhanced my understanding of relational systems. Overall, it strengthened my foundation in RDBMS.

I learned about Python keywords and their significance in programming. I practiced identifying and using reserved words like if, else, and while. Understanding keywords helped me write syntactically correct programs. It also improved my coding accuracy.

Savitribai Phule Shikshan Prasarak Mandal's
SKN SINHGAD COLLEGE OF ENGINEERING,
KORTI, PANDHARPUR

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	5/12/2025	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

I learned about RDBMS (Relational Database Management System). I understood how data is stored in tables using rows and columns. I explored relationships between tables. This helped me understand structured data representation. I also studied advantages like reduced redundancy. This improved my conceptual knowledge. I gained confidence in database concepts. It enhanced my understanding of relational systems. Overall, it strengthened my foundation in RDBMS.

I studied different types of operators in Python such as arithmetic, logical, and relational operators. I implemented small programs to understand their functionality. This helped me perform calculations and logical operations effectively. It strengthened my problem-solving skills.

Savitribai Phule Shikshan Prasarak Mandal's
SKN SINHGAD COLLEGE OF ENGINEERING,
KORTI, PANDHARPUR

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	29/12/2025	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

I studied the relational model in detail. I learned how data is represented in the form of tables. I understood concepts like rows, columns, and relationships. This helped me understand database structure. I also explored how data is logically organized. This improved my understanding of database design. I gained clarity on table relationships. It enhanced my logical thinking. Overall, it was an important learning session.

I explored various inbuilt functions like print(), input(), and len(). I practiced writing simple programs using these functions. These functions made coding easier and more efficient. This session helped me understand basic input-output operations.

Savitribai Phule Shikshan Prasarak Mandal's
SKN SINHGAD COLLEGE OF ENGINEERING,
KORTI, PANDHARPUR

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	30/12/2025	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

On this day, I learned about the rules of E. F. Codd. I understood the principles that define a relational database. I explored how these rules ensure data integrity and consistency. This helped me understand standard database practices. I also learned the importance of following these rules. This improved my conceptual clarity. I gained deeper knowledge of relational systems. It enhanced my understanding of database standards. Overall, it strengthened my theoretical knowledge.

I learned about variables and how to declare and use them in Python. I practiced assigning values and modifying them during program execution. This helped me understand how data is stored and managed. It formed the base for further programming concepts.

Savitribai Phule Shikshan Prasarak Mandal's
SKN SINHGAD COLLEGE OF ENGINEERING,
KORTI, PANDHARPUR

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	31/12/2025	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

I studied different data types used in SQL. I learned about CHAR, VARCHAR, NUMBER, and DATE. I understood how each data type stores specific kinds of data. This helped me design tables efficiently. I also explored their real-world usage. This improved my practical knowledge. I gained confidence in selecting appropriate data types. It enhanced my database design skills. Overall, it was a useful learning session.

I studied different data types such as integers, floats, strings, and booleans. I also practiced identifying and using them in programs. Understanding data types helped me write more accurate and efficient code. It improved my overall programming clarity.

SKN SINHGAD COLLEGE OF ENGINEERING,
KORTI, PANDHARPUR

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	2/1/2026	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

I continued learning about data types, focusing on large object types. I understood how LOBs are used to store large data such as images and files. This helped me understand advanced data storage. I also explored their applications in real systems. This improved my understanding of database capabilities. I gained knowledge about handling large data. It enhanced my technical skills. Overall, it was an important topic.

I learned about type casting and conversion between different data types. I practiced converting values from one type to another using built-in functions. This helped me handle data more flexibly in programs. It also reduced errors during execution.

Savitribai Phule Shikshan Prasarak Mandal's
SKN SINHGAD COLLEGE OF ENGINEERING,
KORTI, PANDHARPUR

Date	3/1/2026	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

I learned about constraints in SQL. I understood how constraints maintain data integrity. I studied NOT NULL, CHECK, PRIMARY KEY, FOREIGN KEY, UNIQUE, and DEFAULT constraints. This helped me understand how to control data entry. I also practiced applying constraints in tables. This improved my practical skills. I gained confidence in database design. Overall, it strengthened my understanding of data validation.

I studied copy operations including shallow copy and deep copy. I understood their differences and applications using examples. This concept helped me manage data duplication effectively. It also improved my understanding of memory usage.

Savitribai Phule Shikshan Prasarak Mandal's
SKN SINHGAD COLLEGE OF ENGINEERING,
KORTI, PANDHARPUR

Date	5/1/2026	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

I practiced implementing constraints in SQL queries. I created tables using different constraints. This helped me understand their practical usage. I focused on maintaining data accuracy and consistency. This improved my coding skills. I also learned how constraints prevent invalid data. It enhanced my problem-solving ability. I gained hands-on experience in SQL. Overall, it was a productive learning session.

I learned about control statements and how they control the flow of a program. I understood the importance of decision-making in programming. This helped me structure programs logically. It made my coding more organized and efficient.

SKN SINHGAD COLLEGE OF ENGINEERING,
KORTI, PANDHARPUR

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	6/1/2026	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

On this day, I started learning about SQL statements, focusing on DQL (Data Query Language). I understood how SQL is used to retrieve data from databases. I learned about the SELECT statement and its importance. This helped me understand how to fetch data from tables. I also explored basic query structure. This improved my practical knowledge. I gained confidence in writing simple queries. It enhanced my understanding of data retrieval. Overall, it was a foundational learning session.

I focused on conditional statements like if, elif, and else. I implemented programs based on different conditions. This improved my logical thinking and decision-making ability. It helped me handle real-time scenarios in coding

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	7/1/2026	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

I studied the SELECT statement in detail. I learned how to retrieve specific columns from a table. I practiced writing queries using SELECT with multiple columns. This helped me understand projection in SQL. I also explored how to display required data. This improved my query writing skills. I gained confidence in retrieving data. It enhanced my understanding of SQL basics. Overall, it strengthened my knowledge of SELECT queries.

On this day, I focused on practicing conditional statements such as if, elif, and else in detail. I worked on multiple problem statements where different conditions were applied. This helped me understand how a program makes decisions based on input values. I practiced writing logical conditions to handle various scenarios. I also analyzed how different conditions affect program output. This improved my logical thinking ability. I gained confidence in writing condition-based programs. It also helped me reduce errors while coding. Overall, it strengthened my understanding of decision-making in Python.

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	8/1/2026	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

I learned about the FROM clause and its role in SQL queries. I understood how it specifies the table from which data is retrieved. I practiced combining SELECT and FROM clauses. This helped me understand query structure. I also improved my ability to write correct queries. This enhanced my practical skills. I gained confidence in database querying. Overall, it was an important learning session.

I learned about looping concepts, especially the for loop. I practiced iterating over sequences such as lists, strings, and ranges. This helped me understand how repetition works in programming. I implemented several programs using for loops. I also explored how loops reduce code redundancy. This improved my coding efficiency. I practiced writing clean and structured code using loops. It enhanced my problem-solving skills. Overall, I developed a clear understanding of iteration.

Main points of the day (Include Figures, if any)

On this day, I focused on the WHERE clause. I learned how to filter data based on conditions. I practiced writing queries with different conditions. This helped me understand selection in SQL. I improved my logical thinking. I also learned how to retrieve specific records. This enhanced my query writing skills. I gained confidence in filtering data. Overall, it strengthened my SQL knowledge

I studied the while loop and its working mechanism. I learned how loops execute based on conditions. I practiced writing programs where the number of iterations was not fixed. This helped me understand dynamic looping. I also compared while loops with for loops. I solved problems using while loops to strengthen my understanding. This improved my control over program execution. It also enhanced my logical thinking. Overall, I gained confidence in using loops effectively.

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	10/1/2026	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

I practiced writing basic queries using SELECT, FROM, and WHERE clauses together. I worked on multiple examples to improve my understanding. This helped me combine concepts effectively. I improved my coding accuracy. I also enhanced my problem-solving skills. This increased my confidence in SQL. I learned how to handle real-time data queries. Overall, it improved my practical knowledge.

On this day, I worked on nested loops and their applications. I learned how one loop can be placed inside another loop. I practiced pattern-based programs using nested loops. This helped me improve my logical thinking and problem-solving ability. I understood how multiple iterations work together. I also focused on improving code structure. This enhanced my understanding of complex looping. It increased my confidence in solving advanced problems. Overall, it strengthened my programming skills.

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	14/1/2026	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

I practiced writing queries using special operators. I worked on filtering data using IN, BETWEEN, and LIKE conditions. This helped me understand pattern matching and range selection. I improved my query writing skills. I also enhanced my problem-solving ability. This increased my confidence in SQL. I learned how to write optimized queries. Overall, it improved my practical knowledge.

I worked on solving multiple programming problems to enhance my coding skills. I practiced identifying and fixing errors in my programs. This improved my debugging ability. I also learned how to approach problems step by step. This helped me develop analytical thinking. I focused on writing efficient code. It improved my problem-solving skills. I gained more confidence in coding. Overall, it enhanced my programming efficiency.

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	15/1/2026	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

I learned about IS and IS NOT operators in SQL. I understood how they are used to handle NULL values. I practiced writing queries involving NULL conditions. This helped me understand missing data handling. I improved my logical thinking. I also enhanced my SQL skills. This increased my confidence in query writing. Overall, it strengthened my understanding of SQL conditions.

I revised all control statements and looping concepts learned earlier. I practiced different problems to strengthen my understanding. This helped me identify weak areas in my knowledge. I focused on improving my logical thinking. I also worked on writing clean and efficient code. This revision improved my confidence. It helped me reduce mistakes in programming. I gained better clarity on concepts. Overall, it reinforced my learning.

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	16/1/2026	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

On this day, I started learning about SQL functions. I understood how functions help in performing operations on data. I explored the importance of inbuilt functions in SQL. This helped me reduce complex query writing. I learned how functions improve efficiency. I also studied their real-time applications. This enhanced my practical knowledge. I gained confidence in using functions. Overall, it was a valuable learning session.

I started learning about functions and their importance in programming. I understood how functions help in code reusability. I created simple functions to perform specific tasks. This helped me structure my programs better. I also learned how functions reduce code duplication. It improved my coding efficiency. I practiced writing and calling functions. This enhanced my programming skills. Overall, it gave me a better understanding of modular programming.

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	17/1/2026	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

I studied single-row functions in SQL. I learned how these functions operate on individual rows. I explored functions related to strings, numbers, and dates. This helped me understand data manipulation. I practiced writing queries using these functions. This improved my coding skills. I gained confidence in handling data. It enhanced my understanding of SQL functions. Overall, it strengthened my knowledge.

I practiced creating user-defined functions with parameters. I learned how to pass values to functions and use them effectively. This helped me understand how functions work in real scenarios. I improved my ability to break programs into smaller parts. I also focused on improving code readability. This enhanced my logical thinking. It made my programs more organized. I gained confidence in writing functions. Overall, it strengthened my programming skills.

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	19/1/2026	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		
Main points of the day (Include Figures, if any)					
I practiced single-row functions through various queries. I worked on string functions like UPPER, LOWER, and LENGTH. I also practiced numeric and date functions. This helped me understand their practical usage. I improved my query writing skills. I also enhanced my logical thinking. This increased my confidence in SQL. Overall, it improved my programming efficiency. I learned about return values in functions and their importance. I practiced writing functions that return results. This helped me understand how data flows in a program. I implemented programs using return statements. This improved my coding efficiency. I also learned how to reuse function outputs. It enhanced my problem-solving ability. I gained confidence in using functions effectively. Overall, it improved my understanding of structured programming.

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	20/1/2026	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

I learned about multi-row functions in SQL. I understood how they operate on groups of rows. I studied functions like COUNT, SUM, AVG, MAX, and MIN. This helped me perform aggregate operations. I practiced writing queries using these functions. This improved my understanding of grouped data. I gained confidence in data analysis. Overall, it strengthened my SQL skills.

On this day, I explored various inbuilt functions in Python in detail. I practiced using functions such as len(), type(), range(), and sum() in different programs. This helped me understand how built-in functions simplify coding. I learned how to apply these functions in real-time scenarios. This improved my coding efficiency. I also reduced the need for writing lengthy code. It enhanced my understanding of Python's capabilities. I gained confidence in using inbuilt functions effectively. Overall, it strengthened my programming skills.

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	21/1/2026	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

I practiced multi-row functions with different queries. I worked on calculating totals, averages, and counts. This helped me understand data aggregation. I improved my query accuracy. I also enhanced my problem-solving ability. This increased my confidence in SQL. I learned how to analyze data effectively. Overall, it improved my practical knowledge.

I started learning about recursion and its basic concept. I understood how a function can call itself repeatedly. I studied the conditions required for recursion to stop execution. This helped me understand its working mechanism. I also analyzed simple examples of recursive functions. This improved my logical thinking. I gained clarity on recursive flow. It enhanced my problem-solving approach. Overall, it built a strong base for recursion.

Main points of the day (Include Figures, if any)

I learned about the GROUP BY clause in SQL. I understood how it groups rows with similar values. I practiced writing queries using GROUP BY. This helped me perform grouped operations. I improved my understanding of data organization. I also enhanced my SQL skills. This increased my confidence in writing queries. Overall, it strengthened my knowledge

I implemented recursion-based programs such as factorial and number series. I practiced writing recursive functions step by step. This helped me understand how recursive calls work internally. I also focused on base conditions to avoid infinite loops. This improved my coding accuracy. I learned how recursion simplifies complex problems. It enhanced my logical thinking ability. I gained confidence in writing recursive programs. Overall, it strengthened my programming concepts.

Main points of the day (Include Figures, if any)

I studied the HAVING clause in SQL. I learned how it is used with GROUP BY for filtering grouped data. I practiced writing queries using HAVING. This helped me understand advanced filtering. I improved my query writing skills. I also enhanced my logical thinking. This increased my confidence in SQL. Overall, it improved my understanding of grouped queries.

I practiced solving more problems based on recursion. I worked on different types of recursive programs. This helped me improve my understanding of recursive logic. I also identified errors and corrected them. This enhanced my debugging skills. I focused on writing efficient recursive code. It improved my problem-solving skills. I gained better control over recursion. Overall, it increased my confidence in advanced programming.

Main points of the day (Include Figures, if any)

I started learning about subqueries in SQL. I understood how queries can be nested within other queries. I studied the working process of subqueries. This helped me understand complex query execution. I improved my logical thinking. I also enhanced my SQL skills. This increased my confidence in writing advanced queries. Overall, it was an important learning session.

On this day, I started learning Object-Oriented Programming (OOP) concepts. I understood the importance of OOP in real-world applications. I learned how OOP improves code reusability and structure. This helped me understand the need for classes and objects. I explored basic OOP terminology. This improved my conceptual understanding. I gained interest in advanced programming. It prepared me for upcoming topics. Overall, it built a strong foundation for OOP.

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	29/1/2026	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

I started learning about joins in SQL. I understood how joins are used to combine data from multiple tables. I explored the importance of relationships between tables. This helped me understand real-time database usage. I also learned basic join concepts. This improved my conceptual clarity. I gained confidence in handling multiple tables. Overall, it was an important learning session.

I studied different types of methods such as instance methods, class methods, and static methods. I understood their differences and uses. I implemented programs using each method type. This helped me understand how methods operate within a class. I improved my coding structure. This enhanced my programming knowledge. I gained confidence in using methods effectively. It also improved code organization. Overall, it strengthened my OOP skills.

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	31/1/2026	Time of arrival	10.30	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON		

Main points of the day (Include Figures, if any)

I studied different types of joins, starting with Cartesian join. I learned how it produces a cross-product of two tables. I practiced writing queries using Cartesian joins. This helped me understand its behavior. I also analyzed its limitations. This improved my understanding of joins. I gained confidence in writing join queries. Overall, it strengthened my SQL concepts.

I implemented programs using different method types. I practiced writing and calling instance, class, and static methods. This helped me understand their practical applications. I improved my coding accuracy. I also focused on writing structured programs. This enhanced my understanding of class behavior. I gained confidence in method implementation. It improved my logical thinking. Overall, it strengthened my programming skills.

Main points of the day (Include Figures, if any)

On this day, I learned about set operators in SQL. I studied operators such as UNION, UNION ALL, INTERSECT, and MINUS. I understood how they combine results from multiple queries. This helped me understand data comparison and merging. I practiced writing queries using set operators. This improved my coding efficiency. I also enhanced my logical thinking. I gained confidence in handling multiple datasets. Overall, it strengthened my SQL knowledge.

I started implementing OOP concepts in real-time applications. I began working on a mini project to apply my knowledge. This helped me understand how theoretical concepts are used practically. I focused on designing proper class structures. This improved my problem-solving skills. I gained hands-on experience in coding. It enhanced my logical thinking. Overall, it prepared me for project development.

On this day, I was introduced to web terminologies used in web development. I learned terms such as client, server, browser, URL, and HTTP. I understood how communication happens between client and server. This helped me understand the basic working of the web. I improved my conceptual knowledge. I also gained clarity on how websites function. This increased my interest in web technologies. Overall, it provided a strong theoretical foundation.

Main points of the day (Include Figures, if any)

I started learning about SQL statements, focusing on DDL (Data Definition Language). I understood how DDL is used to define database structures. I learned commands such as CREATE, ALTER, and DROP. This helped me understand table creation and modification. I improved my conceptual clarity. I gained confidence in database design. Overall, it strengthened my SQL fundamentals.

I continued working on the banking system project. I implemented additional functionalities such as balance checking and transaction handling. This helped me understand method usage and object interaction. I improved my problem-solving skills. I focused on writing efficient code. This enhanced my practical knowledge. I gained better control over program logic. Overall, it improved my coding ability.

On this day, I learned what HTML is and its importance in web development. I understood that HTML is used to structure web pages. I also studied the history of HTML and its evolution. This helped me understand its significance. I improved my theoretical knowledge. I also gained interest in learning further concepts. This increased my confidence. Overall, it was a strong introduction to HTML.

Date	14/2/2026	Time of arrival	8.00	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON, WEBTECH		

Main points of the day (Include Figures, if any)

I studied additional DDL commands such as RENAME, TRUNCATE, DROP, FLASHBACK, and PURGE. I understood their importance in database management. I practiced writing queries using these commands. This helped me understand data removal and recovery. I improved my knowledge of database operations. I gained confidence in managing tables. Overall, it strengthened my SQL skills.

I implemented encapsulation in the banking system project. I secured data using private variables and controlled access through methods. This helped me understand data protection. I improved my coding practices. I focused on writing secure and structured code. This enhanced my programming knowledge. I gained confidence in handling sensitive data. Overall, it improved my project quality.

On this day, I learned about HTML tags. I studied paired and unpaired tags with examples. I practiced writing different types of tags. This helped me understand how content is created in HTML. I improved my coding accuracy. I also enhanced my syntax knowledge. This increased my confidence. Overall, it strengthened my understanding of HTML tags.

Main points of the day (Include Figures, if any)

I started learning about DML (Data Manipulation Language). I understood how DML is used to manage data within tables. I learned commands such as INSERT, UPDATE, and DELETE. This helped me understand data modification. I practiced writing queries using these commands. This improved my practical skills. I gained confidence in handling data. Overall, it strengthened my understanding of data manipulation.

I applied polymorphism in the banking system project. I implemented methods with the same name performing different tasks. This improved flexibility in my code. I understood how to handle different operations efficiently. This enhanced my coding skills. I gained better control over program behavior. It improved my problem-solving ability. Overall, it strengthened my OOP implementation.

I learned about HTML elements and their types. I studied inline elements and block elements. I understood how they behave differently on web pages. This helped me design layouts properly. I improved my conceptual clarity. I also enhanced my coding skills. This increased my confidence. Overall, it improved my understanding of HTML elements.

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	17/2/2026	Time of arrival	8.00	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON, WEBTECH		

Main points of the day (Include Figures, if any)

I practiced DML commands in detail. I inserted records into tables and updated existing data. I also deleted records based on conditions. This helped me understand real-time data handling. I improved my query writing skills. I also enhanced my logical thinking. This increased my confidence in SQL. Overall, it improved my practical knowledge.

I completed the banking system project using all OOP concepts. I reviewed and tested the project for errors. This helped me understand real-world application development. I improved my debugging skills. I gained confidence in handling complete projects. This enhanced my practical knowledge. I also improved my coding efficiency. Overall, it was a significant learning experience.

On this day, I studied HTML attributes. I learned how attributes add additional information to elements. I practiced using attributes like id, class, and style. This helped me customize web pages. I improved my coding skills. I also enhanced my understanding of element properties. This increased my confidence. Overall, it was an important learning session.

Savitribai Phule Shikshan Prasarak Mandal's

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	18/2/2026	Time of arrival	8.00	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON, WEBTECH		

Main points of the day (Include Figures, if any)

I learned about TCL (Transaction Control Language). I studied commands such as COMMIT, SAVEPOINT, and ROLLBACK. I understood how transactions are managed in databases. This helped me understand data consistency. I practiced writing transaction-based queries. This improved my understanding of database control. I gained confidence in handling transactions. Overall, it strengthened my SQL knowledge.

On this day, I started working on a restaurant management system project using OOP concepts. I designed the basic structure of the project by creating classes and objects. I planned functionalities such as menu handling and order processing. This helped me understand how to approach real-time projects. I focused on organizing the code properly. This improved my problem-solving skills. I gained practical exposure to application design. Overall, it strengthened my project development skills.

I learned about list creation in HTML. I studied ordered, unordered, and description lists. I practiced creating lists with different formats. This helped me organize content effectively. I improved my coding accuracy. I also enhanced my understanding of structured data. This increased my confidence. Overall, it strengthened my HTML skills.

SKN SINHGAD COLLEGE OF ENGINEERING,
KORTI, PANDHARPUR

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	19/2/2026	Time of arrival	8.00	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON, WEBTECH		

Main points of the day (Include Figures, if any)

I practiced TCL commands with different scenarios. I worked on managing transactions using COMMIT and ROLLBACK. This helped me understand how to maintain data integrity. I improved my problem-solving skills. I also enhanced my SQL knowledge. This increased my confidence in transaction handling. Overall, it improved my practical understanding.

I continued working on the restaurant project by implementing order management features. I created functions to handle food selection and billing operations. This helped me understand how real-world systems function. I improved my coding logic. I focused on writing efficient code. This enhanced my practical knowledge. I gained confidence in implementing functionalities. Overall, it improved my programming skills.

On this day, I studied table creation in HTML. I learned about table tags and attributes. I practiced designing tables for structured data. This helped me organize information clearly. I improved my coding skills. I also enhanced my understanding of layouts. This increased my confidence. Overall, it was a useful session.

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	20/2/2026	Time of arrival	8.00	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON, WEBTECH		

Main points of the day (Include Figures, if any)

I learned about DCL (Data Control Language). I studied commands such as GRANT and REVOKE. I understood how access permissions are given and removed. This helped me understand database security. I practiced writing queries for user privileges. I improved my understanding of access control. I gained confidence in managing permissions. Overall, it strengthened my SQL skills.

I applied inheritance in the restaurant project to manage different categories like food items and services. I created parent and child classes to organize the system. This helped me reduce code duplication. I improved my program structure. I also enhanced my understanding of class relationships. This strengthened my OOP concepts. I gained confidence in using inheritance practically. Overall, it improved my coding efficiency.

I learned about image handling in HTML. I practiced inserting images and using attributes like src and alt. I also revised formatting tags used for text styling. This helped me improve the visual design of web pages. I improved my coding skills. I also enhanced my understanding of content presentation. This increased my confidence. Overall, it strengthened my HTML knowledge.

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	21/2/2026	Time of arrival	8.00	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON, WEBTECH		

Main points of the day (Include Figures, if any)

On this day, I learned about ranking functions in SQL. I studied functions such as RANK() and DENSE_RANK(). I understood how these functions assign ranks to rows based on specific conditions. I practiced writing queries using ranking functions. This helped me understand data ordering and ranking. I improved my SQL skills. I also enhanced my logical thinking. I gained confidence in using advanced functions. Overall, it strengthened my knowledge of SQL functions.

I implemented abstraction and encapsulation in the restaurant project. I hid internal details and exposed only necessary functionalities. This helped me improve code security and structure. I focused on writing clean and organized code. This enhanced my programming knowledge. I gained better control over data handling. It improved my understanding of secure coding. Overall, it strengthened my project implementation.

On this day, I learned about the anchor tag in HTML. I understood how to create hyperlinks to connect different web pages. I practiced using the href attribute for linking internal and external pages. This helped me understand website navigation. I improved my coding skills. I also enhanced my understanding of linking concepts. This increased my confidence. Overall, it was an important learning session.

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	23/2/2026	Time of arrival	8.00	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON, WEBTECH		
Main points of the day (Include Figures, if any)					
I practiced ranking functions with different datasets. I worked on queries involving RANK() and DENSE_RANK(). This helped me understand the difference between them. I improved my query accuracy. I also enhanced my understanding of data ordering. This increased my confidence in SQL. I learned how to handle ranking scenarios. Overall, it improved my practical knowledge. I completed the restaurant management system project. I tested all functionalities to ensure proper execution. This helped me understand real-world application development. I improved my debugging and testing skills. I gained confidence in handling complete projects. This enhanced my practical knowledge. I also improved my coding efficiency. Overall, it was a valuable learning experience. I studied form creation in HTML. I learned how to create forms to collect user input. I practiced using input fields like text, password, radio buttons, and checkboxes. This helped me understand user interaction. I improved my coding accuracy. I also enhanced my understanding of form elements. This increased my confidence. Overall, it strengthened my HTML skills.

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	24/2/2026	Time of arrival	8.00	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON, WEBTECH		

Main points of the day (Include Figures, if any)

I learned about attributes in databases. I studied key and non-key attributes. I understood how attributes define table structure. This helped me understand database design. I improved my conceptual clarity. I also enhanced my logical thinking. This increased my confidence in database concepts. Overall, it strengthened my knowledge.

On this day, I revised all Object-Oriented Programming concepts through both projects. I analyzed the banking and restaurant systems. This helped me understand how OOP concepts are applied in real scenarios. I improved my conceptual clarity. I focused on identifying mistakes and improving code. This enhanced my confidence in OOP. I gained better understanding of project design. Overall, it reinforced my learning.

On this day, I learned about form attributes in HTML. I studied attributes like action, method, and name. I understood how data is submitted from forms. This helped me understand backend interaction basics. I improved my conceptual clarity. I also enhanced my coding skills. This increased my confidence. Overall, it was an informative session.

Savitribai Phule Shikshan Prasarak Mandal's

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	25/2/2026	Time of arrival	8.00	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON, WEBTECH		

Main points of the day (Include Figures, if any)

I studied different types of keys such as primary key, foreign key, composite key, and super key. I understood their roles in maintaining relationships between tables. I practiced identifying keys in tables. This helped me understand data integrity. I improved my database design skills. I gained confidence in using keys. Overall, it strengthened my SQL concepts.

I started learning functional programming concepts in Python. I was introduced to lambda functions and their usage. I understood how small anonymous functions can simplify coding. I practiced writing lambda expressions. This improved my coding efficiency. I also learned how to use them in simple operations. This enhanced my logical thinking. Overall, it strengthened my understanding of functional programming.

I studied validation attributes in HTML forms. I learned about required, pattern, minlength, and maxlength. I practiced implementing validation in forms. This helped me ensure correct user input. I improved my coding skills. I also enhanced my understanding of form validation. This increased my confidence. Overall, it strengthened my HTML knowledge.

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	26/2/2026	Time of arrival	8.00	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON, WEBTECH		

Main points of the day (Include Figures, if any)

I learned about prime and non-prime attributes. I understood how they are related to keys. This helped me understand normalization concepts. I improved my conceptual clarity. I also enhanced my understanding of database structure. This increased my confidence in SQL. Overall, it strengthened my knowledge of attributes.

I practiced lambda functions in different programs. I used them to perform quick operations without defining full functions. This helped me write concise code. I improved my understanding of functional programming concepts. I focused on reducing code length. This enhanced my coding skills. I gained confidence in using lambda expressions. Overall, it improved my programming efficiency.

On this day, I learned about basic HTML tags used in web pages. I revised commonly used tags and their functions. I practiced creating simple web pages using these tags. This helped me improve my coding speed. I also enhanced my understanding of HTML structure. This increased my confidence. Overall, it was a useful revision session.

STUDENT'S DAILY DIARY/DAILY LOG (Print a copy for per day)

Date	27/2/2026	Time of arrival	8.00	Time of Departure	4.30
Dept./Division	Full Stack Development	Project Title	SQL, PYTHON, WEBTECH		

Main points of the day (Include Figures, if any)

I studied functional dependency in databases. I understood how one attribute depends on another. I learned about total dependency. This helped me understand relationships between attributes. I improved my logical thinking. I also enhanced my database design knowledge. This increased my confidence in SQL. Overall, it strengthened my understanding of dependencies.

I learned about the map() function and its usage. I practiced applying functions to multiple elements in a sequence. This helped me understand data transformation. I improved my coding efficiency. I also reduced the need for loops. This enhanced my programming skills. I gained confidence in using map(). Overall, it strengthened my functional programming knowledge.

I studied media tags in HTML. I learned how to embed audio and video in web pages. I practiced using <audio> and <video> tags. This helped me improve multimedia integration. I improved my coding skills. I also enhanced my understanding of media handling. This increased my confidence. Overall, it strengthened my HTML knowledge.

EVALUATION OF INTERN BY INDUSTRY SUPERVISOR

EVALUATION PERFORMA			
Student Name	Kodag Rutuja Prakash	Roll No.	40
Institute Name	SKN Sinhgad college of engineering Korti Pandharpur		
Internship Project Title	Bleezur.ai: An AI-Powered B2B Sales and Marketing Automation Platform		
Industry Supervisor Name	Vishal Trivedi	Organization Name	SpryIQ Technologies Pvt. Ltd. Pune
Internship From (Start Date)	01/12/2025	Internship To (End Date)	27/02/2026
Parameters			Marks Obtained (Out of 10)
Behaviors			9
Performs in a dependable manner			9
Cooperates with co-workers and supervisors			9
Shows interest in work			9
Learns quickly			9
Shows initiative			9
Produces high quality work			9
Accepts responsibility			9
Accepts criticism			9
Demonstrates organizational skills			9
Uses technical knowledge and expertise			9
Shows good judgment			9
Demonstrates creativity/originality			9
Analyzes problems effectively			9
Is self-reliant			9
Communicates well			9
Writes effectively			9
Has a professional attitude			9
Gives a professional appearance			9
Is punctual			9
Uses time effectively			9
Overall Marks Obtained (Average of marks entered for above parameters)			9/10
Industry Supervisor Name	Vishal Trivedi	Signature	
Signature of Industry Supervisor

STUDENT'S FEEDBACK OF INTERNSHIP
(TO BE FILLED BY STUDENT AFTER INTERNSHIP COMPLETION)

STUDENT FEEDBACK FORM					
Student Name	Kodag Rutuja Prakash	Roll No.	40		
Institute Name	SKN Sinhgad college of engineering Korti Pandharpur				
Faculty Mentor Name	Dr. V. G. Jagtap	Faculty's Designation	Assistant Professor		
Internship Project Title	Bleezur.ai an AI Powered Sales Assistant				
Industry Supervisor Name	Vishal Trivedi	Supervisor's Designation	General Manager		
Organisation Name	SpryIQ	Technologies Pvt. Ltd.	Pune		
Internship From (Start Date)	01/12/2025	Internship To (End Date)	27/03/2026		
Give a brief description of Internship Work					
Was your internship experience related to your major area of study	Yes, to a large degree	Yes, to a slight degree		Not related at all	
This experience has:	Strongly Agree	Agree	No Opinion	Disagree	Strongly Disagree
Given me the opportunity to explore a career field	Yes				
Allowed me to apply classroom theory to practice	Yes				
Helped me develop my decision-making and problem-solving skills	Yes				
Expanded my knowledge about the work world prior to permanent employment	Yes				
Helped me develop my written and oral communication skills	Yes				
Provided a chance to use leadership skills (influence others, develop ideas with others, stimulate decision-making and action)	Yes				
Expanded my sensitivity to the ethical implications of the work involved	Yes				

Department of Computer Science and Engineering

**Savitribai Phule Shikshan Prasarak Mandal's
SKN SINHGAD COLLEGE OF ENGINEERING,
KORTI, PANDHARPUR**

<i>Made it possible for me to be more confident in new situations</i>	Yes				
<i>Given me a chance to improve my interpersonal skills</i>	Yes				
<i>Helped me learn to handle responsibility and use my time wisely</i>	Yes				
<i>Helped me discover new aspects of myself that I didn't know existed before</i>	Yes				
<i>Helped me develop new interests and abilities</i>	Yes				
<i>Helped me clarify my career goals</i>	Yes				
<i>Provided me with contacts which may lead to future employment</i>	Yes				
<i>Allowed me to acquire information and/or use equipment not available at my Institute</i>	Yes				

In the Institute internship program, faculty members are expected to be mentors for students. Do you feel that your faculty coordinator served such a function? Why or why not?

Yes, the faculty coordinator effectively served as a mentor throughout the internship. They provided timely guidance, helped in setting clear objectives, and regularly monitored progress. Their support was valuable in resolving technical challenges and aligning the internship work with academic requirements. The coordinator also encouraged independent learning and ensured that the internship experience remained productive and meaningful.

How well were you able to accomplish the initial goals, tasks and new skills that were set down in your learning contract? In what ways were you able to take a new direction or expand beyond your contract? Why were some goals not accomplished adequately?

I was able to accomplish most of the initial goals and tasks defined in the learning contract. I successfully gained knowledge of Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and backend development using Flask and MongoDB. I also developed practical skills by implementing features such as recommendation systems, email automation, and report generation.

In addition to the planned objectives, I expanded my learning by working on advanced features like AI-based voice call script generation and custom signal detection. Some goals, such as deeper optimization and large-scale deployment, could not be fully achieved due to time constraints and limited access to production-level data.

In what areas did you most develop and improve?

I significantly improved my technical skills in Python programming, backend development, and working with AI technologies such as LLMs and RAG. I also enhanced my problem-solving abilities, debugging skills, and understanding of real-world software development workflows. Additionally, my communication and documentation skills improved through regular reporting and collaboration.

What has been the most significant accomplishment or satisfying moment of your internship?

Department of Computer Science and Engineering

Savitribai Phule Shikshan Prasarak Mandal's
SKN SINHGAD COLLEGE OF ENGINEERING,
KORTI, PANDHARPUR

The most significant accomplishment during my internship was developing an LLM-based recommendation system that generated meaningful customer insights. It was highly satisfying to see how AI could be used to automate business processes such as email generation and reporting, and to contribute to a real-world application like Bleezur.ai.

What did you dislike about the internship?

One challenge during the internship was limited direct interaction due to the remote working environment. At times, it was difficult to get immediate feedback or clarification. Additionally, working with new technologies like LLMs required a steep learning curve. However, these challenges helped in developing self-learning and problem-solving skills.

Considering your overall experience, how would you rate this internship? (Tick One)

Satisfactory

Good

Excellent

Give suggestions as to how your internship experience could have been improved.

The internship experience could be further improved by increasing opportunities for live interaction with mentors and team members. Regular feedback sessions and more structured guidance at certain stages would enhance learning. Providing access to more real-world datasets and production-level systems would also help in gaining deeper practical exposure.
